

Consequences of High Blood Pressure

High blood pressure (HBP) is often the first domino in a chain or “domino effect” leading to consequences, like:

STROKE

HBP can cause blood vessels in the brain to burst or clog more easily.

VISION LOSS

HBP can damage the vessels in the eyes.

HEART FAILURE

HBP can cause the heart to enlarge and fail to supply blood to the body.

HEART ATTACK

HBP damages arteries and causes them to narrow and stiffen.

KIDNEY DISEASE/ FAILURE

HBP can damage the arteries in the kidneys and interfere with their ability to effectively filter blood.

SEXUAL DYSFUNCTION

HBP can be erectile dysfunction in men or arousal dysfunction in women.

A simple **blood pressure check** is the first step to preventing the “domino effect.”
